

Evaluation criteria for the admission to the PhD Course
“Mathematical Models for Engineering, Electromagnetics and Nanosciences”
38th cycle

The final ranking will follow from the results of two examinations: qualifications evaluation and oral exam. Each one is worth 60 points; the candidate must reach at least 31 points in each of the two examinations to be included in the final ranking.

Qualifications Evaluation

- Curriculum Vitae et Studiorum: maximum 25 points; the Committee will evaluate the titles of the candidate, the time taken to obtain them and the type of master degree most relevant to the educational objectives of the specific project of the fellowship.
- Publications: maximum 15 points; only products relevant to the research topics of the specific project of the fellowship will be evaluated.
- Recommendation letters of experts not belonging to the Board of Professors of the PhD course: maximum 20 points; the content and motivations of the judgments provided will be evaluated.

Oral Examination Evaluation

- Coherence of scientific interests and motivations of the candidate with the scientific program of the specific project of the fellowship: maximum 15 points.
- Specific technical competence of the candidate: maximum 45 points.
