

## **Evaluation criteria for the admission exam to the PhD programme in Environmental and Hydraulic Engineering (40th cycle)**

The research project will be evaluated according to the following assessment grid:

### **Research project (max 45 points)**

For the purposes of selection for the PhD programme, the candidate must submit a research project that can be used to assess the candidate's propensity for research and his/her ability to organise the various stages of the project in total autonomy, which must not exceed of 8,000 characters (including spaces). This project, submitted for the purposes of the competition, will not be considered compulsory for the research activity of winner participants.

In particular, there will be evaluated:

- Knowledge of the state of the art (10 points)
- Originality and innovative content (10 points)
- Clarity and completeness of the presentation of objectives, methodologies, and potential results (10 points)
- Relevance of the project to the educational objectives of the PhD programme (10 points)
- Feasibility of the project (5 points)

**Candidates who have obtained at least 27 points in the evaluation of the research project test are eligible for the next test**
