

Dottorato Nazionale in Intelligenza Artificiale

Bando ciclo 38 – Evaluation criteria

Evaluation of the candidacy

The evaluation of the application produces a maximum score of 40 points for each candidate.

The evaluation will consider the curriculum (including the academic career and other certified achievements), the research project, the motivation letter, with particular attention to the topic, the recommendation letters and the publications.

Interview

The interview is conducted in English through videoconferencing. The score that the admission committee assigns to each candidate admitted to the interview is at most 60.

The interview may address any issue concerning the documents submitted for the candidacy. The interview will concern the assessment of the background knowledge, the research capabilities and the interest in scientific development. In addition, the interview will address the topic of the chosen research grant and the personal research interests of the candidate. The duration of the interview is at most 30 minutes, including a presentation of a research project by the candidate, not exceeding 15 minutes. Minimum score to qualify in the interview: 40/60. Minimum total score to qualify for the admission to the PhD: 70/100.
