

Criteria for the admission to the Ph.D. Course in Environmental and Hydraulic Engineering (XXXIX Cycle)

1. Title evaluation (max 15 points)

- Affinity of the academic title to the Ph.D. Course in Environmental and Hydraulic Engineering (up to 4 points)
- Grade of the Bachelor degree (up to 4 points)
- Grade of the Master degree or the average of the grades obtained at all the exams (if the candidate is not graduated yet) (up to 4 points)
- Other titles obtained during the studies (up to 3 points)

Only candidates who have obtained at least 9/15 in the title evaluation step will pass to the oral test.

2. Proposal of research topic (max 45 points)

- Relevance of the research topic to the objectives of the Ph.D. Course in Environmental and Hydraulic Engineering
- Capability to describe the proposal, highlighting backgrounds, objectives and methodologies
- Capability to design, organize and carry out the different phases of the proposal

The research proposal must contain a maximum of 8000 characters.

The proposal is considered admissible if it obtains a grade of at least 27/45.

3. Oral test (max 60 points)

- Motivation and capability of in-depth analysis and of clear presentation of the aspects concerning the proposal (up 30 points).
- Knowledge on topics related to the proposal (up to 30 points)

The oral test is considered passed if the candidate obtains at least 40/60.

The minimum score to be admitted by the Ph.D. Course in Environmental and Hydraulic Engineering is fixed to 76/120.
