

DOTTORATO DI RICERCA IN EXPERIMENTAL MEDICINE
XXXIX CICLO (*secondo anno*)
UNIVERSITA' "SAPIENZA" DI ROMA
Riunione dottorandi del 9 settembre 2025

CURRICULUM A
Experimental Medicine

SCHIERA ELEONORA (3°anno-38°ciclo)

"Over-espressione della proteina MRP-4 in pazienti in trattamento cronico con aspirina in sindrome coronarica acuta".

D'ASCANIO Michela (3°anno-38°ciclo)

"Ruolo dell'infiammazione nello sviluppo e progressione della fibrosi polmonare idiopatica e delle fibrosi polmonari progressive: dati preliminari"

DI CROSTA MICHELE

"Exploring epigenetic modifications to target oncogenic molecules: focus on mutant p53".

FASCIOLO ELENA

"Cross-talk between autophagy and nuclear components through NE/ER contact sites in the human osteosarcoma cells"

MOLITERNI CAMILLA

"Innate Immune Responses to Respiratory Virus Infection and its Regulation"

PIGNATARO ELIA

"Cross-sectional and Correlation Study in Pediatric Atopic Dermatitis: Microbiota, Oncogenic Viruses, Systemic and Local Inflammatory Biomarkers"

TORRINI LUISA

"In vitro peptide-based strategies to overcome antibiotic resistance in Pseudomonas aeruginosa"

CURRICULUM C
Translational Medicine

MENGONI BEATRICE

"Nutraceutical activity of bioactive molecules obtained from plant compounds"

SIMEONE BEATRICE

"Analysis of Key Markers of Autophagy and Related Signal Transduction Mechanisms in Platelets and EPCs of Patients with Coronary Artery Disease: Correlation with Disease Severity, Endothelial Dysfunction, and Oxidative Stress"

ONORI ALESSANDRO (primo anno 40° ciclo)

"CT Angiography characterization of Atherosclerotic Coronary Plaques and their correlation with circulating Inflammatory Biomarkers: implications for precision medicine"
