

How maladaptive family environments and mental health are passed across generations, and how we can prevent that transmission.

PROF. DREW ROTHENBERG, Ph.D

**DUKE UNIVERSITY, SANFORD SCHOOL OF PUBLIC POLICY** 

## Save the Date

08 MAR 09.00 - 13.00 AM

Room 2, Via dello Scalo San Lorenzo, 61

EXAMINING THE INTERGENERATIONAL TRANSMISSION OF FAMILY ENVIORNMENTS AND MENTAL HEALTH: MEDIATING MECHANISMS AND PREVENTION STRATEGIES.

15 MAR 09.00 - 13.00 AM

Room 1, Via dello Scalo San Lorenzo, 61

PREVENTING PATHWAYS TO EXTERNALIZING DISORDERS.

22 MAR 09.00 - 13.00 AM

Room 1, Via dello Scalo San Lorenzo, 61

PREVENTING PATHWAYS TO INTERNALIZING DISORDERS.

28 MAR **08.00 - 10.00 AM** Room 1, Via dello Scalo San Lorenzo, 61 **17.00 - 19.00 PM** Room 11, Via dei Marsi, 78

THE LEAKY MENTAL HEALTH PIPELINE: HOW DO WE TREAT MORE PEOPLE BETTER?

Dr. Rothenberg is visiting professor at the psychology department, Sapienza university of Rome, sponsored by Prof. Laura Di Giunta

## Short Bio and Abstract of the seminars

Drew Rothenberg joined the Center for Child and Family Policy as a postdoctoral associate in September 2018 and now works as a Research Scientist at the Center. His research is focused on the development of adaptive and maladaptive parenting practices and family processes across ontogeny, culture and generations. Utilizing a developmental psychopathology framework, he examines how parenting practices, family dynamics, and evidence-based mental health interventions affect normal and abnormal child development. His program of research has three aims. First, he explores how maladaptive family processes can be passed from one generation to the next. Second, he identifies strategies to prevent the intergenerational transmission of these processes in different culture contexts. Third, he implements these preventative interventions in medically underserved communities that need them the most. He currently works on the Childhood Risk Factors and Young Adult Competence project, funded by the Eunice Kennedy Shriver National Institute of Child Health and Human Development, as part of the Parenting Across Cultures research team.
