PERSONAL AIM

My personal goal is to join an organization that allows me to grow both in terms of skills and career. For me, understanding is a valuable objective both for the individual and for the company as a whole.

WORK EXPERIENCE

VISITING PHD STUDENT AT BURGUNDY SCHOOL OF BUSINESS • 11.2024-IN PROGRESS • LA SAPIENZA UNIVERSITÀ DI ROMA-BURGUNDY SCHOOL OF BUSINESS

In November, I started my visiting position at the Burgundy School of Business in Dijon, where I am implementing my research project and enhancing my knowledge in econometrics and research strategies.

TUTOR • JULY 2024-12.2024 • LA SAPIENZA UNIVERSITÀ DI ROMA

I help student to find scientific sources of information for their thesis and general support for their final work.
My main advice is about:

- Thesis structure;
- Literature review;
- Correct presentation of results.

RESEARCHER • FEBRUARY 2024-11.2024 • I-COM (ISTITUTO PER LA COMPETITIVITÀ

I am currently working in energy and sustainability area.

My main task is about understanding and working with my colleagues to write document summarize what EU and international organization affirms/suggests.

An example of document I wrote or helped to write was about Italian strategy to reach net zero emission by 2050 or the new price generation process that Italy should "accept" in the next years.

COMPETENCES

Main IT competences:
-R;
-Stata;
-Jamovi;
-Excel;
-Power point;
-Word;
-Canva.

Main linguistic competences:
-Italian (native speaker);
-English (intermediate-high level);
-Spanish (intermediate level).

RESEARCHER • MARCH 2023-OCTOBER 2023 • ANIMA CONFINDUSTRIA
Thanks to my PhD course I could work and learn much more about time series analysis in ANIMA.
I worked with data provided by the institute and learnt from senior economists how to deal with this type of information.

TUTOR • JULY 2023-DECEMBER 2023 • LA SAPIENZA UNIVERSITÀ DI ROMA
This job position gave me the opportunity to interact with a wide public, giving explanation about statistics and econometrics.
I helped student in many ways:
-Theoretical explanation of econometric models (linear models);
-Support on Rstudio;
-Advice on data management;
-General support on the reason why using particular statistical tools in a specific way.

PHD CANDIDATE IN SOCIO-ECONOMIC AND STATISTICAL STUDIES • 11.11.2022-IN PROGRESS • LA SAPIENZA UNIVERSITÀ DI ROMA
After a year working as consultant in various field I decided to apply as Phd candidate in socio-economic sciences, a quantitative course that will give me all the necessary instruments to make high level analysis through econometrics and statistical methods.

STAGE • 01.08.2022-30.09.2022 • BTP INFRASTRUTTURE S.P.A.
I started this new job experience that is about managing the accounting of this big firm involved in the costruction of infrastructure in Italy, Libya and Iraq. I learnt to use a new software: Zucchetti.

APPRENTICESHIP • 20.12.2021-31.05.2022 • POSTE S.P.A.
Having concluded my internship in NTTDATA, I started working in Poste Italiane as a financial consultant. Through this job I learnt how to approach to customers with particular needs, as protection or investments.

STAGE • 02.08.2021-29.11.2021 • EVERIS/ NTTDATA
I started my first work experience in a Everis, now NTTDATA, a multinational corporation specialized in information technology. During this short experience I acquired basic notions of SAP, a

business software and to deal with colleagues and external personnel of the corporation. This experienxce made my relational capacities stronger and my determination clearer.

EDUCATION

PHD CANDIDATE IN SOCIO-ECONOMIC AND STATISTICAL STUDIES • 11.11.2022-IN PROGRESS • LA SAPIENZA UNIVERSITÀ DI ROMA
After a year working as consultant in various field I decided to apply as Phd candidate in socio-economic sciences, a quantitative course that will give me all the necessary instruments in order to make high level analysis through econometrics and statistical methods.

MASTER'S DEGREE IN ECONOMICS • 23/07/2021 • UNIVERSITÀ LA SAPIENZA DI ROMA
In these years (October 2019-July 2021) I learned how to manage different programs in order to elaborate some models able to explain some possible or probable regularities from a large dataset composed of different variable, like "consumption", "G.D.P. per capita" and environmental variable such as "temperature" or the presence of nautural resources. I used Matlab in order to resolve complex equation system, Stata for the estimate of various type of econometric models (linear, non linear and spatial), at last I used R, through the which I estimate model for my dissertation, in particular spatial model.
I graduated on 23rd July 2021, my dissertation was about "spatial econometrics". At the beginning the elaboration started ignoring the spatial dependence, looking into the analysis through simple linear and logit models, then a different approch is used, spatial models like S.A.R./S.E.M. are used, until the elaboration of a Bayesian spatial model.
Mark: 110 cum laude/110
Title of dissertation: "Modelli di econometria spaziale per l'analisi dei conflitti in Africa: un approccio Bayesiano".

BACHELOR'S DEGREE IN ECONOMICS • 15/10/2019 • UNIVERSITÀ LA SAPIENZA DI ROMA
During these years (October 2016-october 2019) my study path introduce me to important business and statistical notions that gave me the opportunity to understand on one hand enterprises' problem

in the Italian and global framework and on the other hand macroeconomics e econometrics questions.

I graduated on 15th july 2019, and my dissertation was about the reaction to the crisis of the 2008 and the different reaction to that of Germany and Italy, taking in consideration the central problem of productivity.

Mark: 98/110

Title of dissertation: "Italia e Germania: due realtà a confronto".

ARTICLES, SOCIAL NETWORKS AND ECONOMICS

Among my personal extracurricular activities, I am involved in writing about economic topics. Currently, I contribute to the editorial team of the weekly *Dipende Newsletter* for *Ale.conomista*, which covers current affairs and economic theory. Additionally, I have collaborated with organizations focused on economic dissemination, both on social media and beyond. The organizations I have worked with include:

• *Il Punto Economico*
• *Pillole di Economia*

Furthermore, I worked as a Junior Analyst at the *Istituto Analisi e Relazioni Internazionali (IARI)*, where I wrote various economic and geopolitical analyses.

Specifically, my focus was on analyzing economic phenomena in relation to the cultural aspects of the contexts I examined, hypothesizing potential scenarios. This work was carried out through a careful consideration of economic theory and an internal review process within the institute.

HOBBIES

Among my hobbies, I enjoy reading books on economics, environmental issues, history, and fantasy.

An old hobby that, in a way, shaped me is sports, specifically kickboxing, which I practiced for ten years.

Competing at an agonistic level, this sport taught me the values of perseverance, sacrifice, commitment, and teamwork.

Additionally, I have always been fascinated by the analysis of economic data. In particular, discovering econometrics allowed me to deepen my understanding of this field and approach economic and social issues, seeking solutions both from a quantitative and theoretical perspective.
