

ANNA ZIGRINO

PHD STUDENT

RESEARCH INTERESTS

I feel very passionate about studying attentional biases and bodily misperceptions.

I participated in a study about the Weapon Focus Effect and its relationship with familiarity and expertise toward guns.

Currently researching about body schema vs body model and how our sense of self integrates/disassociates with perception in space.

In the future i'd like to gain a better understanding of movement programming, motor inhibition and kinematics.

SKILLS

-Fluent written and spoken english

-Discrete organizational abilities

-Problem solving competences

-Quite adaptive and flexible

-Good at handling stress-related situations
