

### Job description

#### Intern – IEA Carbon Capture, Utilisation and Storage (CCUS) Unit

[The Organisation for Economic Co-operation and Development \(OECD\)](#) is an international organisation comprised of 37 member countries, that works to build better policies for better lives. Our mission is to promote policies that will improve the economic and social well-being of people around the world. Together with governments, policy makers and citizens, we work on establishing evidence-based international standards, and finding solutions to a range of social, economic and environmental challenges.

[The International Energy Agency \(IEA\)](#) is an intergovernmental organization committed to advancing security of energy supply, economic growth and environmental sustainability through energy policy co-operation. The IEA operates as an autonomous body within the framework of the OECD. Both the OECD and the IEA seek opportunities to work with an increasing number of non-members of growing importance to the world economy. The Agency aims to foster the contribution of the energy sector to economic development and environmental sustainability.

The IEA seeks an intern for a minimum of 3 months to join a team of enthusiastic professionals in the CCUS Unit in the Energy Technology Policy (ETP) Division.

This internship is an excellent opportunity to work with one of the world's leading international organisations on CCUS topics. Through this work, the intern will contribute to in-depth analysis on CCUS and other clean energy technologies to inform policymakers and support the wider deployment of CCUS technologies.

The IEA provides a modest stipend during the internship.

#### Main Responsibilities

Specific responsibilities may depend on the profile and experience of the selected candidate, as well as priorities within the team. General responsibilities, among others, may include:

- Perform research and data collection on CCUS projects, technologies, investments and policies
- Support the development and population of CCUS tracking databases
- Update techno-economic analysis of CCUS across a range of sectors based on recent literature and project data
- Draft content for the IEA CCUS website
- Participate in relevant internal and external events and meetings
- Contribute to the broader work of the IEA, as appropriate

#### Ideal Candidate Profile

- Enrolled in a full-time graduate degree programme for the full duration of the internship, in a field or discipline related to the work of the IEA/OECD.
- Proven research skills and analytical abilities, including data analysis and management. Experience with large datasets and performing techno-economic assessments a plus.
- A good understanding of the energy sector, CCUS technologies, and the opportunities and challenges that come with new and emerging clean energy technologies.
- Fluent in written and spoken English.

### **Contract Duration**

3-6 months starting January-February 2023

### **Application Details**

Interested candidates should submit a CV and cover letter to [ccusinfo@iea.org](mailto:ccusinfo@iea.org) no later than **4 November 2022**, with the email subject “IEA CCUS internship application: [your first name] [your family name]”.

Due to the volume of applications received, only shortlisted candidates will be contacted.

*The IEA is an equal opportunity employer and welcomes the applications of all qualified candidates [who are nationals of [IEA member countries](#)], irrespective of their racial or ethnic origin, opinions or beliefs, gender, sexual orientation, health or disabilities.*
